From the CEO's Desk

As Global Mobility Demand Rises, the Consumption of Fossil Fuels grows, triggering Geopolitical Tensions, Shrinking Oil Reserves, and severe Environmental Impacts. This underscores the Urgent Need for Sustainable Fuels within the Transport Sector. India, facing a Transformative Shift in its Mobility Landscape, must address existing Transportation Gaps while Electric Mobility navigates Immediate Challenges.

Bio-CNG emerges as a Promising Solution, particularly for Rural Areas. Leveraging India's abundant Animal Waste, Bio-CNG provides an Environmentally Friendly and Cost-Effective alternative to Conventional Fuels. Adopting this fuel can significantly lower Greenhouse Gas Emissions while utilizing Biogas By-products as Organic Fertilizers.

Beyond Environmental Benefits, Bio-CNG enhances Rural Economic Opportunities by providing Affordable Market Access and increasing Farmers' Incomes. This Dual Impact supports India's Sustainability Goals, making Bio-CNG a critical pillar of the Mobility Revolution. We remain committed to Implementing Solutions that drive Long-term Economic Sustainability.

CEO - JITENDRA NARAYAN

CLEAN ENERGY • SUSTAINABLE FUTURE

WHY BIOGAS (CBG) PLANTS MATTER TODAY

TURNING WASTE INTO ENERGY, VALUE & SUSTAINABILITY

- RENEWABLE ENERGY SOURCE**
Derived from organic waste, ensuring sustainability.
- REDUCES EMISSIONS**
Captures methane, lowering environmental impact.
- WASTE MANAGEMENT SOLUTION**
Minimizes landfill dependency and pollution.
- ECONOMIC VALUE CREATION**
Generates jobs and supports rural economy.

CBG PLANTS ARE NOT JUST ENERGY SYSTEMS – THEY ARE CIRCULAR ECONOMY ENABLERS.

WORK IN COMPRESSED BIOGAS (CBG)

KEC Aims To Be A Significant Player In India's CBG Market

With a focus on green energy and the agricultural economy, KEC is a young company incorporated in October 2020 by passionate professionals. In the Endeavour to India aims for aggregate 500 GW of clean energy and 5000 CBG plants to its energy output by 2030, KEC aims to utilize its expertise in the CBG industry to establish as one of the major players.

KEC's Project Progress: Infrastructure

CBG Park

- *India's first CBG park to come up in Bulandshahr, UP*
- *To create common infrastructure for small operators to come and invest in CBG park*
- *More parks in pipeline across the nation*
- *In process of setting up CBG with Uttarakhand Government*

Build, Own &
Operate Plants

- *Selectively working on setting up own infrastructure for CBG*
- *Tie-up with Private Dairy for CBG Production*
- *JV with Uttarakhand Dairy for setting up CBG plant to cater to captive steam consumption*

KEC's PROJECT PROGRESS CONT.

PMC, EPC , O & M , Partnerships

Studies, Approvals & Management

- Completed feasibility studies of + projects across India
- Project Management Consultancy (PMC) for 74+ Ongoing projects
- Projects spread in 42 District 14 State across India

EPC

- Managing EPC of 74+ Projects across India
- Order value of above INR 1200Cr + so far

University Tie-Ups

- Setting up incubation at IIT Delhi for research in CBG value chain
- Specific research in Energy Crop Plantation, Bio Digester yields and Bio Manure customization for Crop
- Working With KVK's for development of Napier Grass & other potential Grasses to produced CBG

KEC's PROJECT PROGRESS CONT.

Raw Materials And Product Off-takes

Biomass Supply

- Developing an ecosystem of Supply chain for Biomass
- Aggregation & Cultivation of Energy Crops & Agriculture residue
- Diversified biomass resources

Energy Crop

- Continuous research of Energy crop to ensure round the clock plant operations
- 100+ Acre plantation partnering of Napier at Bulandshahr & Palwal
- Critically observing yield of energy crops

Gas Offtake

- Coordinating off take arrangement with oil PSUs (IOCL / BPCL / Gail Gas
- Setting up own delivery stations
- Private client sale tie-ups

Bio Manure

- Tie up with PSUs for offtake of Bio Manure
- Developing Distribution Model for Bio-Manure or Enriched FOM (Liquid & solid)

INDIA'S BIOFUEL ENERGY

CLEANER TODAY. **STRONGER** TOMORROW.

India's energy future is **GREEN**.

At the heart of this transformation is CBG – Clean, Sustainable and Circular.

KEC is proud to be an emerging force in this revolution, driving change from villages to the nation and powering a self-reliant India.

**KEC – AN EMERGING PLAYER.
A POWERFUL IMPACT.**

FUELLING INDIA'S FUTURE WITH CLEAN ENERGY

Turning Organic Waste
Into Clean Energy

Building Aatmanirbhar
and Sustainable India

Empowering Farmers,
Strengthening Economy

CBG – THE ENERGY THAT POWERS GROWTH

REDUCES IMPORT DEPENDENCY
Supports India's energy
security

LOWER EMISSIONS
Contributes to a cleaner,
greener tomorrow

WASTE TO WEALTH
Converts waste into
value and opportunity

RURAL ECONOMY BOOST
Generates jobs and fuels
local development

SUSTAINABLE FUTURE
Building a better planet
for generations

KEC & CBG INDUSTRY ROADMAP

India Needs Over **5000 CBG** Plants by 2030!

The question is will you be part of this
Energy revolution?

Invest in Change With KEC

CLEAN ENERGY

Sustainable fuel
for a greener future

WASTE TO WEALTH

Transforming waste into
energy & organic manure

ECONOMIC GROWTH

Boosting rural economy
& creating jobs

ATMANIRBHAR BHARAT

Reducing oil imports &
building energy independence

BENEFITS OF BIOFUEL

Benefit Of CBG Expands Beyond Energy Sector

Environmental

- Greenhouse gas and other pollutant reduction
- Circular economy by utilizing waste materials and producing valuable energy and fertilizer.
- Improve soil health
- Carbon Emission reduction & Offsetting
- Wastewater management

Economic

- Reduce import dependency
- Creating value out of waste
- Value chain - Empowerment to Entrepreneurs & farmers
- High ROI & Payback
- CBG viable option to replace CNG.
- CBG can provide an additional source of revenue for farmers

Social

- Job Creation
- Eco-friendly, renewable, and clean source of energy
- Local energy transition
- Rural Development
- Decentralized energy access

POLLUTION CATEGORY OF CBG PLANTS

FOM Production Elevates The Plant To White Category With Less Regulatory Requirements

**CBG plants
producing FOM
and LFOM**

*and not discharging
any wastewater
(Any Feed Type)*

Feed Type:
*plant- based
crop residue **AND**
Plant-based
animal waste*
No FOM or LFOM

Feed Type:
*municipal solid
waste **AND**
plant- based
processed
waste*
No FOM or LFOM

*White: Pollution index ≤ 20 (Non-Polluting)

Green: Pollution index between 21-40

Orange: Pollution index between 41-59

Red: Pollution index ≥ 60

**Projects under the category of "WHITE" will not require either Environmental Clearance under Environment (Protection) Act, 1986 or Consent under Air (Prevention and Control of Pollution) Act, 1981 and Water (Prevention and Control of Pollution) Act, 1974.*

GERMANY: LEADING THE BIOGAS MARKET

Investing In Biogas Proven To Be A Winning Strategy For Germany

Yoichi Yoshizawa New Business & Technology
Development Center Mitsui & Co. Deutschland GmbH

© Fachverband Biogas e.V. / German Biogas Association

- **Biogas Plants: 10000 Approx.**
- **Cumulative installed capacity: 5,700MW**
- **Contributes: Approx. 6% of all electricity generated**
- **Employs 46,000 people**
- Exports engineering technology for biogas plants.
- Post the gas crisis in Europe triggered by the Russia-Ukraine war, the industry expects strong tailwinds for biogas and compressed biogas (CBG)/biomethane in Germany to become mainstream energy fuels, with private firms showing renewed interest.
- Global private markets firm Partners Group has recently acquired a 60 megawatts (MW) portfolio 'Platform', consisting of 35 biogas plants and 10 biomethane plants across northeast Germany, for selling biogas-based electricity to the grid

In CBG, Returns Follow Structure

CBG PARK OVERVIEW

A Plug & Play Model

- Ideal for Entrepreneurs, Startups, Government and Corporate
- Cluster(s) of 2.4 TPD incremental units with common facilities
- Investors can customize units based on needs

Services Offered:

- Land procurement
- Raw feed aggregation
- Technology transfer
- EPC & PMC services
- Common utilities & facilities
- CBG filling station
- Transportation support
- Skilled training center
- Carbon credit assessment provision

WHY CBG PARK?

Smoother Raw Material Supply Chain

Market Challenge

In the absence of a uniformly implemented structure, market players across feedstock type are struggling to ascertain continuous and cost-effective access to quality feedstock

KEC assesses feedstock availability, aggregation, transport, and yield to

- *Address bottlenecks in the supply structure.*
- *Ensure support for the continuation of raw feed supply*
- *Help Maintain optimal plant operation.*

Confidential for KEC recipients only

WHY CBG PARK?

Hassle Free Selling of CBG By-product

Market Challenge

Fermented Organic Manure (FOM) produced as a CBG by product is underutilized by farmers due to lack of knowledge and additional enrichment needed for proper use.

KEC buys all FOM by-product for a hassle-free operation for the plant owner

- *KEC Handles FOM enrichment to be used as organic fertilizers*
- *Works on marketing and farmer education to generate demand from the end users*
- *Transfers the risk of selling/disposal of the by-product away from the owners*

Confidential for KEC recipients only

CBG INVESTMENT OPPORTUNITY TO SET UP CBG PLANT

Greater ROI With Bigger Plant Capacity

	CBG Plant Size (TPD)			
	2.4	4.8	12	20
Investment (INR Cr) <i>with steel Structure</i>	Average cost is 4-8 Cr / TPD			
Land Requirement (Acre)	2-3	5	10-12	20
ROI <i>(Return on Investment)</i>	40%	45%	50%	50%
Payback (years)	≥3	>3	2-3	≥2
Net Revenue (INR Cr /yr.)	3.5	8.3	17.9	36.04
Bank Loan (%)	70%			
Promoter Contribution (%)	30%			
15yrs Buy back Agreement <i>with OMC, IOCL, GAIL, BPCL, HPCL etc.</i>	Yes			
Subsidy 3300CBM <i>(% up to 10 Cr INR)</i>	20% on capex (approx.)			
Subsidy on bio-Manure/ Raw Material	1500/- Rs Per Kg for Bio-Manure & Support in Machinery of Raw Material Aggregation			

Additional State Subsidies

- UP: Additional 20% , Assam – 25% , MP -40% , Gujarat – 40% & other state have Mega Policy
- Uttarakhand Subsidy < 40%
- Bihar: Additional 15% on Plant and Machineries
- Other States including Gujrat and MP provide support on Machinery of raw material aggregation
- The Cost of Hilly State Would be More than 25% Higher.

Other benefits

- Additional benefits in Stamp duty, Electricity charges, Duties, Single window, interest subsidy, Rebate in electricity varies state to state
- [Carbon Credit Certificates as additional revenue streams for CBG producers. Indicative revenues from organic MSW feedstock based 10 TPD CBG plant ie CBG@50/- Eventually in 2023 its CBG@70/- Kg](#)

"Energy Security Needs Local Fuel. Bio-CNG Plants Are the Answer."

KEC Agritech | Building India's Bio-Energy Infrastructure

KEC Bio-Manure , Soil Improvement , Soil Moisture

Bio-manure FOM / LFOM , When used as a carbon enhancer, offers significant benefits for soil health and plant growth, including increased organic carbon levels, improved water retention, enhanced nutrient availability, and long-term soil fertility

- Increased Organic Carbon
- Improved Soil Structure and Water Retention:
- Enhanced Nutrient Availability
- Long-Term Soil Fertility
- Carbon Sequestration
- Reduced Reliance on Chemical Fertilizers
- Increased Microbial Activity
